

Introduction to CTFs

Phish 'n' Chips Team

Giulio De Pasquale - @peperunas
depasquale@giugl.io

Who are we?

Students that enjoy solving
security challenges and have a
good time!

We don't bite (usually)

What is a CTF?

CTF stands for:

Capture the Flag

The flag is a token representing the solution of a challenge.

It usually looks like this:

```
flag{w0w_th1s_1s_l33t_stuff}
```

What kind of challenges are there?

- Reverse Engineering
- Binary Exploitation
- Web Exploitation
- Forensic and Steganographic Analysis
- Cryptography
- Programming
- Adversarial Machine Learning
- ...???

Jeopardy vs. Attack-Defense

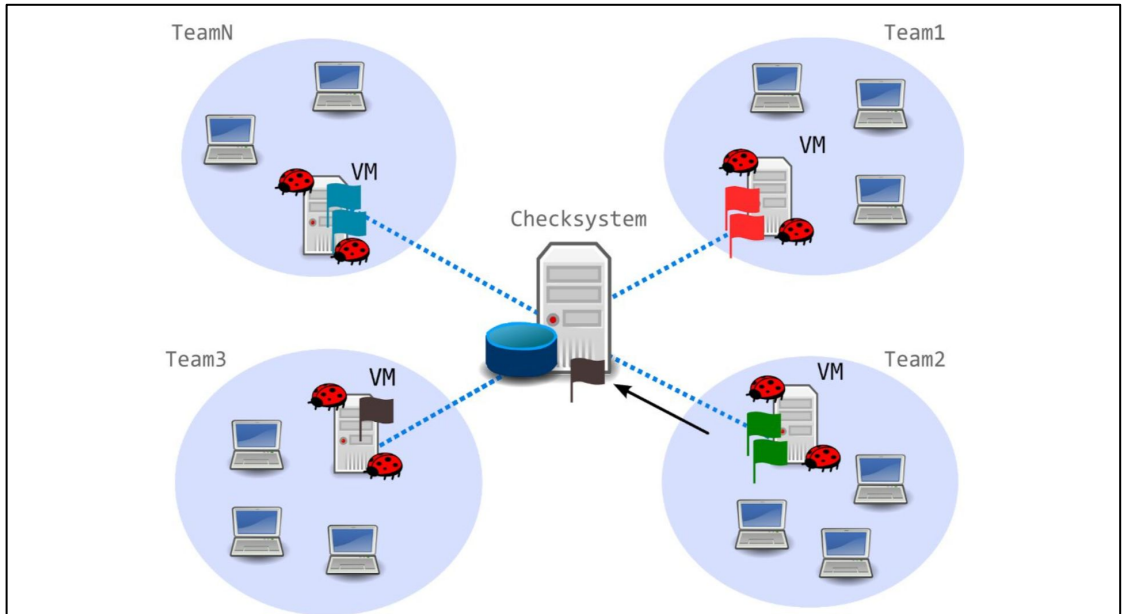

Phish 'n' Chips CTF Users Scoreboard Challenges

Challenges

Forensics

42.tar.gz ✓ 25	Table Tennis 50	
Data Exfil ✓ 100	My Secret Stash ✓ 100	
Neurosurgery 250	Pcap Me If You Can 300	From Our Fr 3
Lite Forensics 500		

Jeopardy

Attack-Defense

Famous CTFs

- CCC
- CodeBlue
- DEFCON
- HITCON
- UCSB's iCTF (academic only)
- PlaidCTF
- RuCTFe

Why CTFs?

You can **learn by playing**

You can develop ***your own* tools** to solve specific tasks

You will encounter **demanding but rewarding** challenges

Teamwork!
